

DOUBLE DISC FERTILIZER SPREADER

SEMBRA **1300/1500 PAV**

DOUBLE DISC FERTILIZER SPREADER

SEMBRA

1300/1500 PAV

Sembra 1300 and 1500 PAV models are double disc fertilizers spreaders compatible with medium tractors, with good autonomy, wide range and uniform distribution.

- /// Dual disk distribution system with variable angle launchers to adjust the distribution range from 7 to 24 m
- /// Chassis designed in bent tube, reducing welding seams for greater strength.
- /// The polyethylene tank with U.V protection with quick coupling facilitates removal for cleaning and maintenance of the equipment. The capacities of 1300 or 1500 l carry a bag of fertilizer
- /// Eccentric vertical agitator system with bearings that reduces the breakage of seeds and fertilizer granules
- /// Stainless steel dosing bases, with opening in a special format that allows you to configure bass distribution volumes (hydraulic drive)
- /// Front adjustment with graduated scale and adjustment to adjust the drop point of products on the disc
- /// Robust SAE 90 oil-coated transmission boxes with helical bevel gears
- /// Nylon protective screen to block the passage of lumps and unwanted objects

TECHNICAL SPECIFICATIONS

Model	Sembra 1300	Sembra 1500
Volumetric capacity (l)	1300	1500
Load capacity (kg)	1800	2000
Weight (kg)	296	306
Length (m)	2,23	2,23
Width (m)	1,59	1,59
Height (m)	1,37	1,43
Tractor power required (hp)	75	75
Tractor hydraulic lift capacity (kg)	2500	2500
Disc rotation (rpm)	720	720

*Weight and dimensions may vary depending on the product version.
Project changes may occur without prior notice.
